

Sports Club Management System

Build the digital backbone of a club that has outgrown WhatsApp and Excel.

1) The Challenge

Your task is to build **one unified software platform** that solves the real, day-to-day operational headaches of a modern sports club. Think of it as the **digital backbone** of a thriving tennis, padel and badminton club. Read the scenes that follow as things that actually happen in an ordinary week, and design the system that makes each of them easy.

2) Meet The Champions Club

The Champions Club is a busy sports club with **tennis and cricket courts** that members book, **a gear shop** selling rackets, balls, shoes and accessories, and **a bar and cafeteria** that serves food and drinks after matches. Its member base is growing across three tiers: **Gold (premium, full access), Silver (standard) and Junior (under 18, discounted)**. A **front desk** handles walk-ins, phone calls and staff schedules.

How Things Run Today

- **Court bookings:** Arranged over WhatsApp
- **Member lists:** Kept in Excel sheets
- **Bar receipts:** Written on paper
- **Court availability:** Checked by phone calls
- **Revenue and operations:** No visibility at all

The owner is losing money, members are frustrated, and staff are overwhelmed.

3) A Week at the Club

The scenes below follow one week at The Champions Club, from the first-time member at the front desk to the owner reviewing the month. **Every one of them is a problem someone at the club faces today.**

A new member walks in

Someone signs up at the front desk. The club needs to know who they are, **which plan they are on** (Gold, Silver or Junior), and **what that plan entitles them to**, from court rates to discounts at the shop and the bar.

Their membership will run out one day, and nobody should have to remember when. Whenever they turn up, any member of staff should be able to **recognise them quickly and see their history with the club.**

Booking a court on a busy evening

It is 6 pm. Members are messaging the front desk, a walk-in is standing at the counter, and someone is on the phone asking what is free. **Sessions last an hour, a new slot opens every half hour, and each member can play at most twice a day.**

Members pay less than walk-ins, or nothing at all, depending on their plan. Plans change, people cancel, and on Friday night the courts open up for **social play** where

many people share one court. Through all of it, **two people must never end up on the same court at the same time.**

Gearing up before a match

A member's racket string snaps ten minutes before play. Another wants new shoes and would rather **order them from home and collect them at the club, or have them delivered.**

The club sells rackets, balls, shoes, accessories and apparel, and it should always **know what is in stock and when something is running low.** What a member buys at the counter and what they order from their sofa **come from the same shelf.**

After the match, at the bar

Twenty people arrive at once. Orders are scribbled on paper, tabs get lost, and the kitchen keeps asking who ordered what. **Members expect their discount without having to ask,** and some would rather **run a tab** and settle up before they leave.

Guests pay by **cash, card or UPI.** **Staff work in shifts, tables need to be tracked,** and at closing time the owner wants to know **what the bar actually earned that day.**

A stranger finds the club online

Someone searches for a place to play near them. Today the club has **no website,** so they never find it. If they could see the club, its plans and prices, what is free this week, and what the shop sells, they might **book a trial session** on the spot.

When a visitor reaches out, **that enquiry should not vanish.** Someone at the club should hear about it, **follow up, send a quote** and, hopefully, welcome a new member.

The owner, at the end of the month

The owner sits down and asks a simple question: **how much did we earn, from where, and what do we owe?** Money arrives from courts, the shop and the bar, by card, cash and online, and today **none of it is in one place.**

There are **memberships and business clients to invoice, employees to pay, leave to approve, and taxes to report.** The owner wants to see how the club is doing **today, this week and this month,** and to **share the numbers** when needed.
